COMMON FEATURES FOR ALL HEAVY-DUTY APTIV RADIOS

HEAVY DUTY DESIGN — Made for a commercial vehicle driver by having larger buttons and a heavy-duty construction for tougher environments.

SAE J1455 COMPLIANT — Meets all the test standards for reliability of an electronic component in a commercial vehicle.

WEATHER BAND (WB) — Offers National Weather Radio Broadcasts from over 1,025 locations throughout the U.S. on seven VHF/FM frequencies free-of-charge to provide continuous weather information 24 hours a day.
Range: 162.400 MHz - 162.550 MHz

ISO CONNECTOR — Allows the radio to connect directly to the vehicle's harness; no additional harness is required — no cutting, no separate accessories to purchase for all commercial vehicles manufactured with the ISO connect harness.

FRONT AUX INPUT (MUSIC PORT) — Easy access to plug in a smart device and enjoy your digital music library through the vehicle's speakers.

REAR AUX INPUT — Provides an auxiliary terminal for permanent hard wire to the rear side of the radio.

SAE J1939 COMPLIANT — Allows the different vehicle components that run on the communication bus system to talk to each other; compatible with most digital steering wheel / rear-sleeper controls.

QUARTZ ALARM CLOCK — Convenient, built-in quartz alarm clock with one hour timer.

OUTPUT POWER — 18 W x 4 Channels
18 W x 2 Channels (24 Volt Radios)

SOUND QUALITY (EQ) FUNCTION — Select the sound type (Pop, Rock, Country, News, Jazz, Classical or Manual) to improve the dynamic range.

SEPARATE BASS, MID, TREBLE, BALANCE AND FADER CONTROL

6 AM / 12 FM RADIO PRESET BUTTONS

AUTO STORE MEMORY

AUTO BAUDRATE — Capable of auto detecting the correct CAN bus baud rate to use at power up; the possible baud rate is 250K or 500K.

MECHLESS — No Compact Disc (CD) player

SHALLOW CHASSIS — 86.5 mm in depth

VF DOT MATRIX DISPLAY — Three line display that maximizes the viewing area on the front of the radios. This allows for more information on the screen and minimizes the need to scroll.

WHITE FAKRA AM/FM ANTENNA CONNECTOR — Robust locking mechanism, small form factor with high speed capability which allows for better cable management.

MOTOROLA TO FAKRA ADAPTER CABLE — AM/FM Radio Antenna Adapter Fakra Jack code B to Motorola DIN socket Connector six-inch cable. Adapter cable included with each APTIV radio model until OEM truck manufacturers change wiring from Motorola to FAKRA

*Solar power from Pana-Pacific offers robust, vehicle-focused solar panel options to ensure longer battery life, more uptime, and lower fleet costs. Many fleets see **full payback in less than a year**!*

What Makes Our Solar Different?
Unlike residential or RV applications, solar panels on trucks are constantly moving. This means:

The solar panels may be partially shaded or simply not positioned for direct sunlight.
Pana-Pacific's solar panel options are designed with added redundancy to ensure peak performance in low-light situations.

The solar panels will be subjected to the intense vehicle vibration and road hazards.
Pana-Pacific's solar panel options are designed to meet the robust requirements of the on-road application to ensure longevity and continuous uptime.

Solar panel kits can be installed using the included adhesive, plug-and-play harness and perimeter tape.

Go Power! Solar Systems for Commercial Vehicles are Designed to be Ultra-Rugged

MPPT (Maximum Power Point Tracking) **controllers** are potted and IP68 rated.

- *Mount anywhere and withstand shock, vibration, and heat*
- *95% efficient and stay efficient around 85 – 90% in low light conditions*
- *Extra safeties and redundancies for use 365 days a year at maximum capacity*

'**True Flexible**' **solar panels** built with flexible membrane and cells, **NOT** glass which can break.

Harnesses are constructed to survive the elements; made in corrugated tubing with shrink wrapping and IP68 connectors. **NO** bare wires.

Installation is peel-and-stick using heliobond adhesive and panel perimeter tape to ensure no water or dirt gets underneath the panel(s) to cause peeling. Harness tape allows for the harness to be installed anywhere.

5-Year Warranty for commercial use.

MEDIUM-DUTY RADIO HARNESS GUIDE

All of the medium duty trucks manufactured by Hino, Isuzu and Mitsubishi-Fuso require one of four diferent connectors to adapt the plug on the instrument panel harness (originally inserted directly into the OEM radio) to an adapter harness that will allow the use of a Pana-Pacific supplied aftermarket radio.

Some truck manufacturers have used at least three of these types of plugs at various times in the last 20 years, and some of these plugs have been used by all three of the medium duty truck manufacturers. The four different connectors can be distinguished by the number of pin positions in each.

| 10-Pin Connector | 13-Pin Connector | 14-Pin Connector | 16-Pin Connector |

These "truck side" connectors are matched with three "radio side" connectors which fit any radio Pana-Pacific sells. Although each of the radio side connectors has 16 pin positions, they can be distinguished by size and color: **Panasonic Grey, Panasonic Black or ISO-DIN.**
